

UPUTSTVO AUTORIMA ZA PRIPREMU RADA

UPUTSTVO AUTORIMA

Journal Resuscitatio Balkanica je kvartalni interdisciplinarni medicinski časopis i službeni je list Resuscitacionog Saveta Srbije. Objavljeni radovi se odnose na etiologiju, patofiziologiju i prevenciju srčanog zastoja, obuku za reanimaciju, kliničku reanimaciju i sisteme brzog odgovora.

Istraživački radovi za eksperimentalnu reanimaciju (uključujući studije na životinjama) se objavljuju povremeno, ali samo ako su izuzetno interesantni i direktno se odnose na kliničku kardiopulmonalnu reanimaciju.

Radovi koji se odnose na traumu objavljuju se povremeno, ali većina njih se tiče specifičnog traumatskog srčanog zastoja.

Dobrodošla su pisma urednika, posebno u vezi sa člancima koji su objavljeni u Journal Resuscitatio Balkanica. Journal Resuscitatio Balkanica ne objavljuje izveštaje o slučajevima.

Vrste radova koje se objavljuju u časopisu:

1. Originalni naučni (stručni) rad. Pod originalnim naučnim radom se podrazumeva rad u kome se prvi put objavljuju rezultati sopstvenih istraživanja.
2. Kratko ili prethodno saopštenje što podrazumeva originalni naučni rad punog fomata ali manjeg obima.
3. Pregledni rad koji sadrži originalan, detaljan i kritički prikaz istraživačkog problema ili područja u kome je autor već ostvario određeni doprinos, prikazan u vidu autocitata.
4. Naučna kritika, odnosno polemika na određenu naučnu temu zasnovanoj na naučnoj argumentaciji.
5. Pisma uredniku

LIMIT REČI (isključujući apstrakt i reference)

Originalni naučni (stručni) rad * 3000
Kratko ili prethodno saopštenje * 1500
Pregledni rad * 4000
Editorial 1200
Pismo uredniku 500

TABELE / LIMIT ILLUSTRACIJE

Originalni naučni (stručni) rad * 6
Kratko ili prethodno saopštenje * 3
Pregledni rad * 8
Uvodnik 1
Pismo uredniku 1

REFERENTNA LIMITA

Originalni naučni (stručni) rad * 40
Kratko ili prethodno saopštenje * 20
Pregledni rad * 75
Uvodnik 30
Pismo uredniku 5

Ukoliko je rad deo magistarske teze, odnosno doktorske disertacije, ili je urađen u okviru naučnog projekta, to treba posebno naznačiti u napomeni na kraju teksta. Takođe, ukoliko je rad prethodno saopšten na nekom stručnom sastanku, navesti zvaničan naziv skupa, mesto i vreme.

Rukopise treba pripremiti u skladu sa "Vankuverskim pravilima" "UNIFORM REQUIREMENTS FOR MANUSCRIPTS SU BM IT TEDTOB IO MEDICAL JOURNALS", koje je preporučio ICMJE (International Committee of Medical Journal Editors - Ann Intern Med. 1997;126:36-47.)

Rukopise u elektronskoj verziji slati na adresu E -pošte:
office@resuscitatio.org.rs

Uz rukopis članka treba priložiti potvrdu o autorstvu. Uredništvo daje sve radove na stručnu recenziju. U radovima gde može doći do prepoznavanja opisanog bolesnika, treba pažljivo izbeći sve detalje koje ga mogu identifikovati, ili pribaviti pismenu saglasnost za objavljivanje od samog bolesnika ili najbliže rodbine. Kada postoji pristanak, treba ga navesti u članku. Radovi se ne vraćaju i ne honorišu.

TEHNIČKI ZAHTEVI

Celokupni tekst, reference, naslovi tabela i legende slika treba da budu u jednom dokumentu. Tekst fajlovi pripremiti u Microsoft Office Word programu font Times New Roman, veličine 12 ppt. Paragraf pisati tako da se ravna samo leva ivica (Alignment left). Ne deliti reči na slogove na kraju reda. Ne koristiti uvlačenje celog pasusa (Indentation). Ubaciti samo jedno prazno mesto posle znaka interpunkcije. Ostaviti da naslovi i podnaslovi budu poravnani uz levu ivicu. Svaki naslov u tekstu rada: uvod, metodologija, ciljevi rezultati diskusija zaključak i ključne reči postaviti na sredinu tj centrirati.

Grafikoni, sheme (crteži) sa natpisom ispod grafikona npr. grafikon br 1 izrađivati u programu Excel, Koristiti font veličine 10pt i priložiti u originalnom programu - fajlu sa tabelom iz koje se konstruiše grafikon (ne uvoziti i ne linkovati iz drugih programa). Sheme raditi u programu Corel DrawH3 ili ranijoj verziji (ne uvoziti i ne linkovati u Corel Draw iz drugih programa), ili gotovu shemu snimiti ili skenirati u rezoluciji 300dpi u jpg formatu označiti ih arapskim brojevima po redosledu pojavljivanja u tekstu i navesti naziv.

Svi podaci kucaju se u fontu Times New Roman 12. I grafikone i sheme dostaviti uz rad u elektronskom obliku i navedenom formatu, a u radu naznačiti mesto gde grafikoni ili sheme treba da budu postavljeni (npr. Grafikon 1..., Shema 1... crvenim slovima).

Korišćene skraćenice objasniti u legendi ispod grafikona ili sheme na srpskom i engleskom jeziku. Sve tabele raditi u programu Word (ne uvoziti i ne linkovati u Word iz drugih programa), sa proredom 1 (single). Sa natpisom tabela br 1 iznad same tabele. I tabele dostaviti uz rad u navedenom formatu u radu naznačiti mesto gde tabele treba da budu (npr. Tabela 1) crvenim slovima. Same tabele, slike i grafikone se mogu umetnuti u tekst na mestu gde treba da se pojave u radu

Slike se označavaju se arapskim brojevima redosledom navođenja u tekstu (Slika 1) i sa nazivom na srpskom i engleskom jeziku. Fotografije snimati digitalnim fotoaparatom u jpg formatu ili skenirati sa rezolucijom 300 dpi, u dovoljnoj veličini ne manjoj od 6 cm x 8 cm i priložiti uz rad kao poseban fajl, a u radu naznačiti mesto gde slika-fotografija treba da bude (npr. Slika 1, Fotografija... crvenim slovima). Ukoliko je slika ili fotografija već negde objavljena, citirati izvor.

Uvod, Cilj rada, Metod, Rezultati, Zaključak;

svaki od navedenih segmenata pisati kao poseban pasus koji počinje boldovanim reči.

PRIPREMA RUKOPISA:

PRVA STRANICA sadrži: potpuni naslov. Naslov treba da što vernije opiše sadržaj članka. U interesu je časopisa i autora da se koriste reči prikladne za indeksiranje i pretraživanje. Ako takvih reči nema u naslovu, poželjno je da se naslovu pridoda podnaslov. Kraću verziju naslova (do 70 slovnih mesta); ime srednje slovo i prezime svih autora; naziv, mesto i adresu institucija iz kojih su autori, (brojevima u zagradi povezati sa imenima autora); eventualnu zahvalnost za pomoć u izradi rada; predlog kategorije rukopisa (originalni rad, pregledni članak, prikaz slučaja i dr); ime i prezime i srednje slovo, godinu rođenja autora i svih koautora, punu adresu, broj telefona i e-pošta autora za korespondenciju.

DRUGA STRANICA sadrži: sažetak (uključuje naslov rada, imena autora i koautora i imena ustanova iz kojih su autori) se sasto-

ji od najviše 250 reči. Sažetak ne može imati fusnote, tabele, slike niti reference. U sažetku treba izneti važne rezultate i izbeći opšte poznate činjenice. Sažetak treba da sadrži cilj istraživanja, material i metode, rezultate i zaključke rada. U njemu ne smeju biti tvrdnje kojih nema u tekstu članka. Posle sažetka napisati 3 do 8 ključnih reči na srpskom jeziku.

Ključne reči su termini ili fraze koje najbolje opisuju sadržaj članka za potrebe indeksiranja i pretraživanja. Treba ih dodeljivati s osloncem na neki međunarodni izvor (popis, rečnik ili tezaurus) koji je najšire prihvaćen ili unutar date naučne oblasti, npr. u oblasti medicine Medical

Subject Headings, ili u nauci uopšte, npr. lista ključnih reči Web of Science.

TREĆA STRANICA sadrži: prošireni sažetak na engleskom jeziku (extended summary) i 3 do 8 ključnih reči na engleskom jeziku (key words).

NAREDNE STRANICE: Označite dalje rednim brojem sve preostale stranice rukopisa. Svako poglavlje započnite na posebnom listu. UVOD mora biti kratak, s jasno izloženim ciljem članka i kratkim pregledom literature o tom problemu.

MATERIJAL I METODE moraju sadržati dovoljno podataka da bi drugi istraživači mogli ponoviti slično istraživanje bez dodatnih informacija. Imena bolesnika i brojeve istorija bolesti ne treba koristiti, kao ni druge detalje koje bi omogućili identifikaciji bolesnika. Treba navesti imena aparata, softvera i statističkih metoda koje su korišćene.

REZULTATE prikazite jasno i sažeto. Ne treba iste podatke prikazivati u tabelama i na grafikonima. Izuzetno se rezultati i diskusija mogu napisati u istom poglavlju.

U DISKUSIJU treba raspravljati o tumačenju rezultata, njihovom značenju u poređenju sa drugim, sličnim istraživanjima i u skladu sa postavljanim hipotezama istraživanja. Ne treba ponavljati već napisane rezultate. Zaključke treba dati na kraju diskusije ili u posebnom poglavlju.

PRILOZI UZ TEKST Svaka tabela ili ilustracija mora biti razumljiva sama po sebi, tj. i bez čitanja teksta u rukopisu.

Tabele: Iznad tabele treba da stoji redni broj i naslov (npr: Tabela 1. Struktura ispitanika). Legendu staviti u fusnotu ispod tabele i tu objasniti sve nestandardne skraćenice.

Ilustracije (slike), Fotografije moraju biti oštre i kontrastne. Broj crteža i slika treba ograničiti na najnužnije (u principu ne više od 4 – 5). Ukoliko se slika preuzima sa interneta ili nekog drugog izvora, potrebno je navesti izvor. Ispod ilustracije treba staviti redni broj iste i naslov, a ispod ovoga legendu, ukoliko postoji. Naslove i tekst u tabelama i grafikonima dati i na engleskom jeziku

ZAHVALNICA. Navesti sve saradnike koji su doprineli stvaranju rada a ne ispunjavaju merila za autorstvo, kao što su osobe koje obezbeđuju tehničku pomoć, pomoć u pisanju rada ili rukovode odeljenjem koje obezbeđuje opštu podršku. Finansijsku i materijalnu podršku u vidu sponzorstva, stipendija, poklona, opreme, lekova i drugo, takođe treba navesti.

Prpratno pismo. Uz rukopis obavezno priložiti pismo koje su potpisali svi autori, a koje treba da sadrži: izjavu da rad prethodno nije publikovan i da nije istovremeno podnet za objavljivanje u nekom drugom časopisu, te izjavu da su rukopis pročitali i odobrili svi autori koji ispunjavaju merila autorstva. Takođe je potrebno dostaviti kopije svih dozvola za: reprodukovanje prethodno objavljenog materijala, upotrebu ilustracija i objavljivanje informacija o poznatim ljudima ili imenovanje onih koji su doprineli izradi rada.

REFERENCE: Sastavni delovi referenci (autorska imena, naslov rada, izvor itd.) navode se u svim člancima objavljenim u časopisu na isti način, u skladu sa usvojenom formom navođenja. Preporučljiva je upotreba punih formata referenci koje podržavaju vodeće međunarodne baze namenjene vrednovanju, kao i Srpski citatni indeks, a propisani su uputstvima: APA – Publication Manual of

the American Psychological Association. Numerišu se redosledom pojave u tekstu. Reference u tekstu obeležiti arapskim brojem u uglastoj zagradi [...]. U literaturi se nabraja prvih 6 autora citiranog članka, a potom se piše "et al". Imena časopisa se mogu skraćivati samo kao u Index Medicus -u. Skraćenica časopisa se može naći preko web sajta <http://www.nlm.nih.gov/>. Ako se ne zna skraćenica, ime časopisa navesti u celini.

Literatura se navodi na sledeći način:

Članci u časopisima

[1] Ross P, Nolan J, Hill E, Dawson J, Whimster F. Upotreba AED-a policijskih službenika u gradu Londonu. Resuscitation 2001; 50: 141–6.

[6] Oguro M, Imahiro S, Saito S, Nakashizuka T. Podaci o smrtnosti japanske hrastove bolesti i okolnih šumskih kompozicija, Mendeley Data, v1; 2015. <http://dx.doi.org/10.17632/xwj98nb39r.1>

Numeracija referenci za lična komunikacija, neobjavljeni podaci ili rukopisi koji su "u pripremi" ili "podneseni za objavljivanje" su neprihvatljivi.

Autorstvo.

Sve osobe koje su navedene kao autori rada treba da se kvalifikuju za autorstvo. Svaki autor treba da učestvuje dovoljno u radu na rukopisu kako bi mogao da preuzme odgovornost za celokupan tekst i rezultate iznesene u radu.

Autorstvo se zasniva samo na: bitnom doprinosu koncepciji rada, dobijanju rezultata ili analizi i tumačenju rezultata; planiranju rukopisa ili njegovoj kritičkoj reviziji od znatnog intelektualnog značaja u završnom doterivanju verzije rukopisa koji se priprema za štampanje.

Sakupljanje podataka ili generalno nadgledanje istraživačke grupe sami po sebi ne mogu opravdati autorstvo.

Svi drugi koji su doprineli izradi rada, a koji nisu autori rukopisa, trebalo bi da budu navedeni u zahvalnici s opisom njihovog rada, naravno, uz pisani pristanak.

Ukoliko je rad deo magistarske teze, odnosno doktorske disertacije, ili je urađen u okviru naučnog projekta, treba posebno naznačiti u napomeni na kraju teksta. Takođe, ukoliko je rad prethodno saopšten na nekom stručnom sastanku, navesti zvaničan naziv skupa, mesto i vreme održavanja.

Instruction to the authors:

Journal Resuscitatio Balkanica is quartal interdisciplinary medical journal and is the official journal of the Serbian Resuscitation Council.

The papers published deal with the aetiology, pathophysiology and prevention of cardiac arrest, resuscitation training, clinical resuscitation, and rapid response systems.

Experimental resuscitation research papers (including animal studies) are published occasionally, but only if they are of exceptional interest and related directly to clinical cardiopulmonary resuscitation.

Papers relating to trauma are published occasionally but most of these concern specifically traumatic cardiac arrest.

Review articles and Letters to the Editor, particularly relating to articles previously published in Journal Resuscitatio Balkanica, are welcome. We do not publish case reports..

Types of articles published in this journal

1. Original Paper . Original scientific paper is the paper in which the results of their own research are first published.
2. Short Paper or prior announcement, which implies the original scientific work of a full-fledged, but smaller volume.
3. A review paper containing an original, detailed and critical view of a research problem or area in which the author has already made a certain contribution, presented in the form of autocities.
4. Commentary and Concepts, on a particular scientific subject based on scientific argumentation.
5. Letters to the editor

Commentary and Concepts* 20
Editorial 30
Letter to Editor 5

If the article is a part of a master's theses or a part of a dissertation, or it is made through a scientific project, it should be emphasized in a reference at the end of the text. Likewise, if an article has been presented at scientific convention, precise information of the time, place and title of the event should be noted. Manuscripts should be prepared according to the Vancouver Recommendation s " UNIFORM REQUIREMENTS FOR MANUSCRIPTS SUBMITTED TO BIOMEDICAL JOURNALS" recommended by ICMJE (International Committee of Medical Journal Editors – Ann Intern Med. 1997;126:36-47.) With the manuscript a certificate of authorship should be attached. Editorial staff forwards all the articles to the expert peer reviewers. Publisher doesn't return manuscripts and doesn't provide fees.

TECHNICAL DEMANDS

Complete text, references, titles of the charts and picture legends should be in one document. Text files should be typed in Microsoft Office Word program (extension.doc), using font Times New Roman size 12, with left alignment and no indentation. The words should not be cut at the end of the row, and after punctuation one character spacing should be made. Every title and subtitle (introduction, methodology etc.) should be centered. If the text contains special characters (symbols), Symbol font should be used. Do not use commercial names of drugs and other medicaments. Instruments (equipment) should be referred to by their trade names, producer's name and address, typed in parenthesis. Abbreviations should not be used unless absolutely necessary. Full term should be given in first appearance in the text for each abbreviation used, except for standard units of measurement. Numbers should be rounded to one decimal whenever possible. For decimal numbers coma should be used as a decimal separator in Serbian text, but period in English text as well as in tables, graphs and other illustrations. Measure units should be given according to International System of Units SI, Temperature should be specified in degrees Celsius (°C), the amount of substance in moles (mole), and blood pressure in millimeters of mercury (mm Hg).

Charts, diagrams and pictures

Charts should be made in Microsoft Office Excel program, using font size 10, and attached to the original file, along with the table from which the chart is constructed (do not import and insert links from other programs). They should be marked with Arabic numerals in order of appearance and titled in both Serbian and English. All the data within charts should be typed with Times New Roman size 12 in both Serbian and English. Abbreviations used in graphs should be explained in a legend below it in both languages.

Diagrams should be made by Corel Draw H3 program or earlier version (do not import or insert links from other programs into Corel Draw), or previously prepared diagram could be recorded and scanned with resolution 300 dpi in .jpeg format, marked with Arabic numerals in order of appearance and titled. All the data should be typed with Times New Roman size 12, in both Serbian and English. Abbreviations used in graphs should be explained in a legend below it in both languages.

Charts and diagrams should be submitted with the manuscript in electronic form (specified format), with the indication of their exact place in the text (e.g. Chart 1, Diagram 1... written in red). Abbreviations used in the text should be explained in the legends beneath the charts and diagrams in Serbian and in English.

Tables should be prepared in MO Word (do not import or insert links into Word document from other programs) with single line spacing. Titled tables should be submitted along with the manuscript in electronic form and specified format with indication of their exact place in the text (e.g. Table 1 written in red).

Pictures and photographs should be marked with Arabic numerals in order of appearance with titles in both Serbian and in English. Photographs should be taken by digital camera formatted as .jpg file or scanned in resolution 300 dpi, sized adequately (at least 6-8cm) and submitted with manuscript as a separate file, with indication of their exact place in the text (e.g. Picture 1, Photo 2... written in red). If the photograph has already been published elsewhere, reference of the source should be documented.

Every chart or illustration should be self-explanatory, i.e. understandable even without reading the text of the article. Legends should be in the footnotes beneath, with explanation of all nonstandard abbreviations. Number of graphs and illustrations should be limited to 4 or 5 necessary. Note that all charts, schemes and pictures can be inserted directly onto their position in the text

MANUSCRIPT PREPARATIONS

FIRST PAGE should be the title page of your manuscript file. The title should be short, clear and informative, corresponding to the content of the paper and it should not contain abbreviations. Subtitles should be avoided. It is best to use words appropriate for searching and indexing, in best interest of the journal and the author. If the title doesn't have such words, it would be advisable to add a subtitle – shorter version of the title (up to 70 characters). First page also contains full names of all authors, names and addresses of institutions where they work (use numbers in brackets to link them with names of authors), gratitude note possibly for the help in article realization, suggestion of the article type (original article, case report, review ...) and e-mail of the corresponding author.

SECOND PAGE should contain a structured abstract (including again the title of the article, names of authors and coauthors and names of institutions in which each of them works) written in both Serbian and English. If the original article is in Serbian language, it is desirable to provide the expanded translation of the abstract, a kind of a summary.

It states the objective of the work, basic methods of research and analysis, used materials, important results (statistic relevance) and main conclusion. The abstract cannot contain footnotes, figures, pictures or references. Statements that do not exist in the article text should be avoided, as well as general known facts. Abstracts of original articles should have 250 words and following subtitles: Introduction, Aim, Method, Results and Conclusion. Each of these parts should be written as a separate paragraph that begins with a bolded word. Three to six keywords or short phrases which summarize the content of the paper should be given under „Keywords” below the Abstract.

KEY WORDS are terms or phrases that describe adequately the contents of the article for the purpose of indexing and searching. They should be appointed relying on an international source (index, vocabulary or thesaurus) accepted within specific scientific field, e.g. in medical circles Medical Subject Headings, or generally (e.g. key words index Web of science). The text should be paginated from one onwards, commencing with the Title Page within bottom margin.

SUBSEQUENT PAGES should contain the remaining sections. Every section should be on a separate page. An original work should have the following subtitles: Introduction, Aim, Method, Results, Discussion, Conclusion, References.

INTRODUCTION should be concise, with a brief argumentation of the reasons for the study or research clearly stating the objective and a brief literature overview of the theme. A hypothesis, if there is one, and the aims of the work deriving from that hypothesis should be noted.

METHOD AND MATERIALS section must contain enough information for other researchers to repeat the investigation. All the details that could enable recognition of the patient should be avoided. Identify methods, apparatus (producer's name and place in parenthesis) as well as procedures, statistical methods and software in order to enable other authors to repeat the results. When reporting on experiments on humans, it should be emphasized that the procedure was done in accordance with the Declaration of Helsinki and Recommendation for Conduct of Clinical Research from 1975, revised in 1983. The compliance of the authorized ethics committee is also obligatory. Names, initials or patients' card numbers should never be published, especially if the material is illustrated. If there is a possibility of recognizing the patient, all details that can provide identification should be excluded, unless written consent for publishing is acquired from the patient or his relatives, which should be emphasized in the manuscript. You should also state if the principles of animal protection according to laws and regula-

tions were followed in experiments. A detailed account of statistical methods used should be given in order to enable that a well-informed reader can check the results. Whenever possible, quantify the results and also state the corresponding statistical flaw index (e.g. SD, SE or credibility borders). Avoid relying only on statistical testing of the hypothesis, such as *r* value, which does not provide relevant quantitative data. Always discuss the plausibility.

RESULTS should be presented clearly and concisely. Do not repeat all the data from the tables or illustrations in the text, emphasize or summarize only significant observations. The results and discussion can be presented in the same section.

DISCUSSION should contain interpretation of the results according to assumed hypothesis, their significance in relation to other similar researches. Do not repeat results that have already been presented. Do not repeat in detail the data and material previously disclosed in Introduction or Results. Implications of findings and their restrictions, including those of relevance for future research, should be included in Discussion. Observations should be connected to other relevant studies, in particular those done within the last three-year period, and only in special cases older than these.

CONCLUSIONS can be given at the end of the discussion or in a separate section. Relate the conclusions to the aims of the paper. When appropriate, recommendations can be included.

ACKNOWLEDGMENTS

All other persons who have made substantial contributions to the work reported in the manuscript (e.g. data collection, analysis, and writing or editing assistance) but who do not fulfill the authorship criteria should be named with their specific contributions, with written permission of course. Sources and funding, sponsorships, scholarships, gifts, equipment and medicines should also be listed.

COVER LETTER

Along with the manuscript a cover letter should be submitted, signed by all qualified authors. It should contain a statement that the article hasn't been previously published or submitted for publishing in another journal. The letter should also include a statement that all those designated as authors (who meet the authorship criteria) have read and approved the article.

REFERENCES

Regular components of references (authors' names, article title, source etc.) are noted in the same way in every article published in the journal, according to accepted form of referencing. The use of format supported by leading international bases of referencing, and Serbian Citation Index, following in fact the instructions of APA (Publication Manual of the American Psychological Association), is highly recommended. References should be listed in order of appearance. Identify references in text, tables and legends using ordinal numbers in square brackets [1]. If the number of authors exceeds six then six should be named and the rest should be referred to as "et al". Names of the journals can be abbreviated only according to Index Medicus. Abbreviations can be found at <http://www.nlm.nih.gov/>. Full title of the journal should be written if the abbreviation is unknown.

References should be listed in order of appearance in the text. The number of references should not exceed 30, except in reference overview where there could be up to 50. Most of the cited works should not be older than 5 years. All data on cited literature must be correct. All works, regardless of their original language, are to be cited in English, with reference to the source language in parenthesis after the title (e.g. in Serbian, in Russian, in French, etc.). The style of citing should be the same as in Index Medicus (see the examples below). Citations from abstracts, secondary publications, oral announcements, unpublished papers and certified and classi-

fied documents are not accepted. References to papers accepted but not yet published are acceptable, but should be designated as „in press” and with the name of journal.

EXAMPLES OF CORRECT REFERENCE FORMS

The following are sample references:

Articles in Journals

Numbered references to personal communications, unpublished data or manuscripts either 'in preparation' or 'submitted for publication' are unacceptable. If essential, include this material at the appropriate place in the text.

AUTHORSHIP

All individuals listed as authors should qualify for authorship. Each author should have participated sufficiently in the work to take public responsibility for the article content and presented results. One or more authors should take responsibility for the integrity of the work as a whole, from inception to published article. Authorship credit should be based on substantial contributions to conception or design of the work, or the acquisition, analysis, or interpretation of data for the work; and drafting of the work or revising it critically for important intellectual content; and final approval of the version to be published. Gathering of the data or just supervision of the research team is not enough to justify authorship. All other persons who have made substantial contributions to the work reported in this manuscript (e.g., data collection, analysis, or writing or editing assistance) but who do not fulfill the authorship criteria should be named with their specific contributions and affiliations in an acknowledgment of the manuscript, with written permission of course. If the article is a part of master's theses or dissertation, or it came out from a certain scientific project, it should be noted at the end of the text. Likewise, if the article has already been presented at a scientific convention, precise name of the event, as well as time and place where it happened should be noted.

SUBMISSION OF MANUSCRIPT

The manuscript, together with all illustrations, could be sent by registered mail, by email or submitted in person in the Editorial office.
